I sent out the MCHM material which was the priority since it was not DOT regulated. I was not able to send out the PPH.

I'm going to hold off sending out the PPH until the lab requests it.

Thanks

Good morning Adam.

I've been out sick; first day back into the office. Has this gone out yet?

I have an FOH appt later this morning till about 2:30 or so. I'll try to catch up with you this afternoon.

Thanks

Susan Shinn

Susan,

It looks like we need to ship another set of standards. We will need to ship the neat MCHM and crude MCHM just like last time but now we will be adding an additional standard called "PPH".

I've attached MSDS's for PPH, Neat MCHM, and Crude MCHM.

I've just received some unrelated analytical standards from a company called "Accustandard." I'm going to ship the material using the box that I received from Accustandard. The box has a red warning sticker that looks like its related to hazardous transport. I've attached a scan of that label. Should I keep this label on or remove it?

I'm going to ship out 2mL of each substance and wrap it up the same way we did the last shipment.

I also have a UPS account and I can print labels. Can I print a label from my account or do you need to print a special label because this is hazardous material?

<< File: Dow PPH, Basic MSDS.pdf >> << File: MSDS of MCHM.pdf >> << File: Neat MCHM MSDS.pdf >>

If we have enough to send both MCHM and PPh then send both. Priority is MCHM.
